Selenium Lab Assessment

--	--

Perform the below activities for each Requirements

General Instructions:

- 1. Use the existing React – Spring Boot REST Application (Created for Manual Testing)**
- 2. Perform the W3H Analysis on the Automation Testing Scenarios**

(Use Manual Testing Doc as Reference)

- 3. Prepare a Test Document which contains the Automation Test Cases which can be performed in front-end and back-end.**
- 4. Use Selenium for performing automation testing on your application**
 - a. Use Selenium IDE to record/run the test cases**
 - b. Use Selenium Java code to Automation test your application functionalities (Use only ChromeDriver)**
 - c. Use TestNG to create test cases**

Notes:

- 1. Perform Automation Testing after developing the Test Cases & Test Scenarios**
- 2. Documents to be Submitted:**
 - a. Selenium IDE test cases Screen Shots**
 - b. Test Case Documents**
 - c. Selenium Scripts Used**
 - d. Test Success /Failure Screens**

--	--

W3H Analysis: Bank Management System

What	How
<p>What are user stories that are present here?</p> <p>Ans</p> <ul style="list-style-type: none"> • Create/Update/Delete Payee • Money transaction & record the histories of transaction <p>What is testing we are going perform in the Scenario?</p> <p>Ans Automated Testing using selenium</p> <p>What were we going to test in the user stories?</p> <p>Ans</p> <ul style="list-style-type: none"> • Insert Payee • Edit Payee • Update Payee • Delete Payee • Transfer Money • Transaction History <p>What are the selenium components that were going to be used for this automation testing?</p> <p>Ans</p> <ul style="list-style-type: none"> • Selenium IDE • Web Driver 	<p>How can we select the web element in this scenario?</p> <p>Ans</p> <ul style="list-style-type: none"> • By using find element by name • By using find element by id • By using find element by xpath <p>How can we select the element in the Navbar?</p> <p>Ans</p> <ul style="list-style-type: none"> • By using find element by link text • By using find element by id • By using find element by CSS Selector <p>How to record the automated testing process?</p> <p>Ans</p> <ul style="list-style-type: none"> • By using Selenium Gird • By using Web Driver • By using Selenium IDE <p>How to perform the automation in the code itself?</p> <p>Ans</p> <ul style="list-style-type: none"> • By Web Driver • By Selenium IDE

Why	Why not
How can we select the web element in this scenario? Why?	How can we select the web element in this scenario? Why Not?

<p>Ans</p> <ul style="list-style-type: none"> • By using find element by name (Because the name is default select and to avoid the ambiguity among other elements) <p>How can we select the element in the Navbar? Why?</p> <p>Ans</p> <ul style="list-style-type: none"> • By using find element by link text (Because navbar will content angular tag to navigate to other pages) <p>How to record the automated testing Process? Why?</p> <p>Ans</p> <ul style="list-style-type: none"> • By using Selenium IDE (Because selenium IDE provide the support of Record the code and Autogenerate the scripts for testing) <p>How to perform the automation in the code itself?</p> <p>Ans</p> <ul style="list-style-type: none"> • By Web Driver (Because web driver is fully based on the programming perspective) 	<p>Ans</p> <p>Because other elements may cause or have the chances of ambiguity</p> <p>How can we select the element in the Navbar? Why Not?</p> <p>Ans</p> <p>Because navbar will contains linked text element to navigate with in the web side</p> <p>How to record the automated testing Process? Why?</p> <p>Ans</p> <p>Because selenium IDE provide the support of Record the code and Autogenerate the scripts for testing But others don't have that specific option</p> <p>How to perform the automation in the code itself?</p> <p>Ans</p> <p>Because the web driver is fully based on the programming perspective, it is based on object – oriented concept.</p>
